REALIZZAZIONE OPERATIVA

- Coordinamento elaborazione dati e realizzazione editoriale a cura dell' U.O. tecnica Progetti Speciali Assessorato all'Ambiente-Provincia di Milano.
- Rilevamenti picrometrici a cura del Consorzio Acqua Potabile-Settore Geologia e del Comune di Milano - Settore Acquedotto.
- Analisi campioni effettuate presso il Presidio Multizionale d'Igiene e Prevenzione di Milano (P.M.I.P.) U.O. Chimica ed U.O. Medica U.S.S.L. 75/III.
- Prelevi campioni d'acqua per analisi a cura delle U.S.S.L. competenti per territorio.

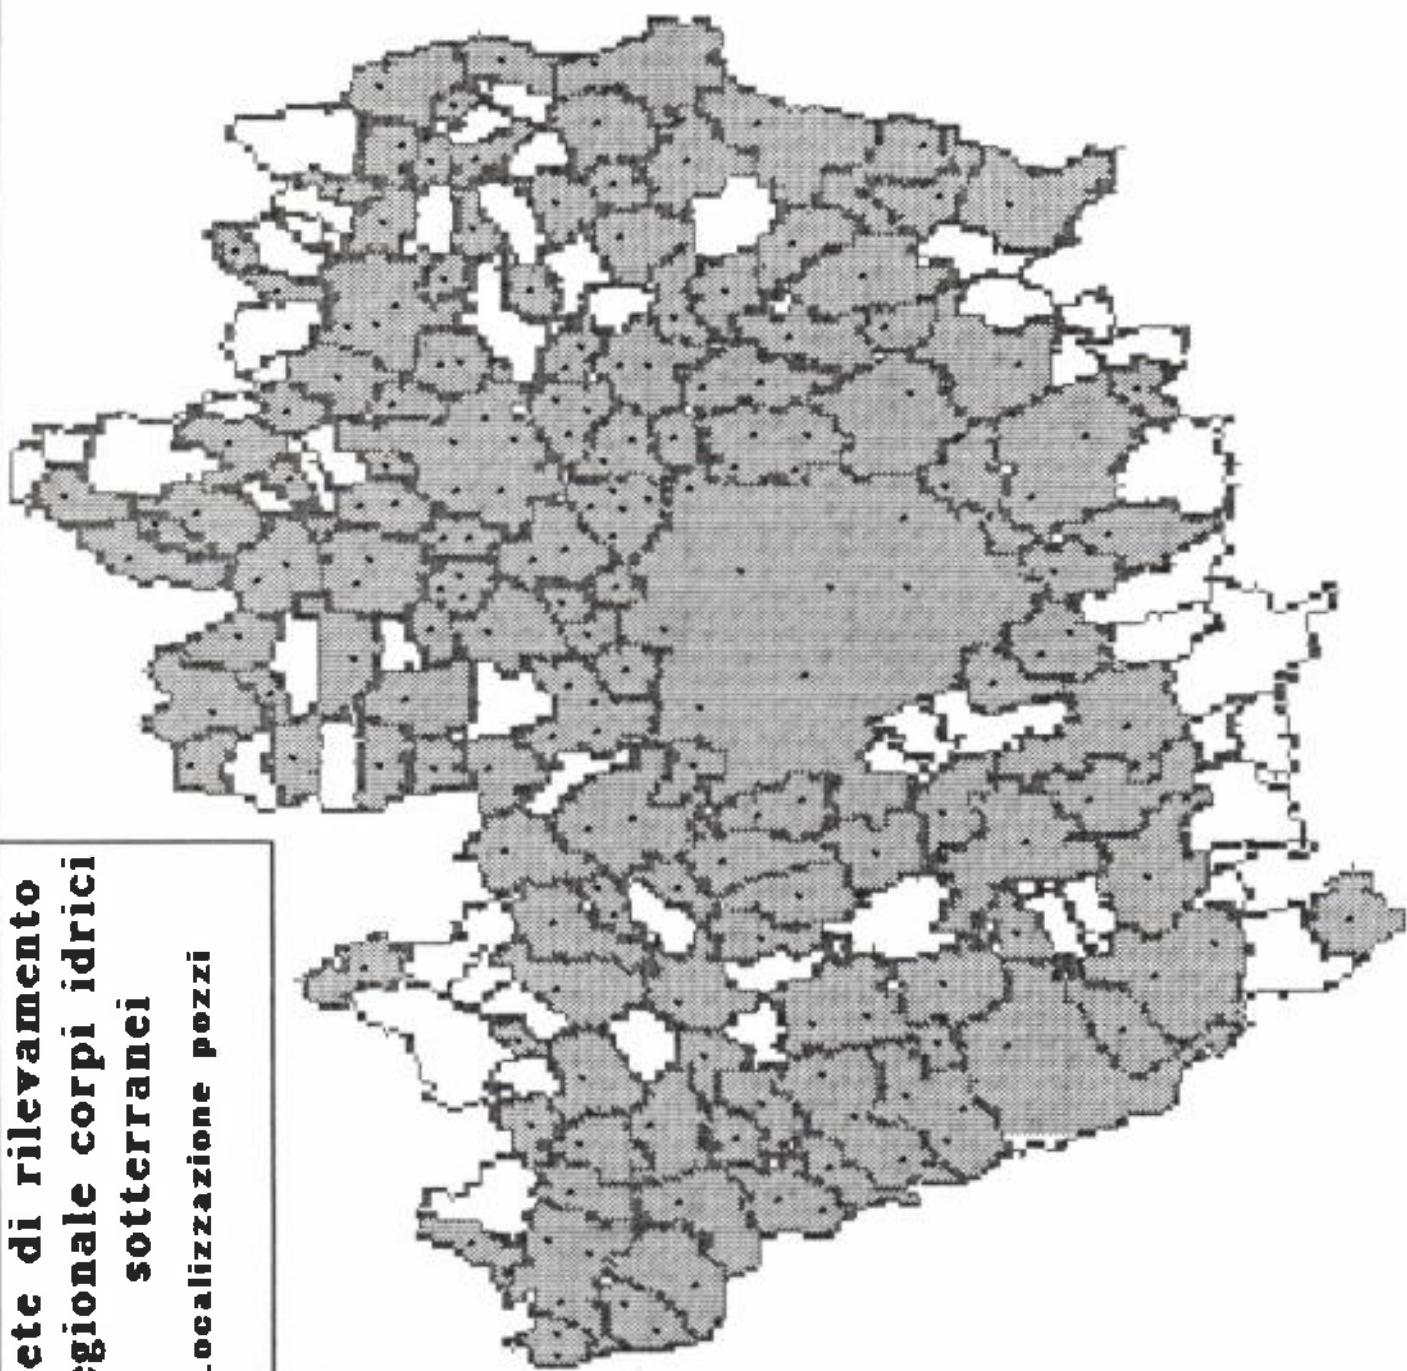

PREMESSA

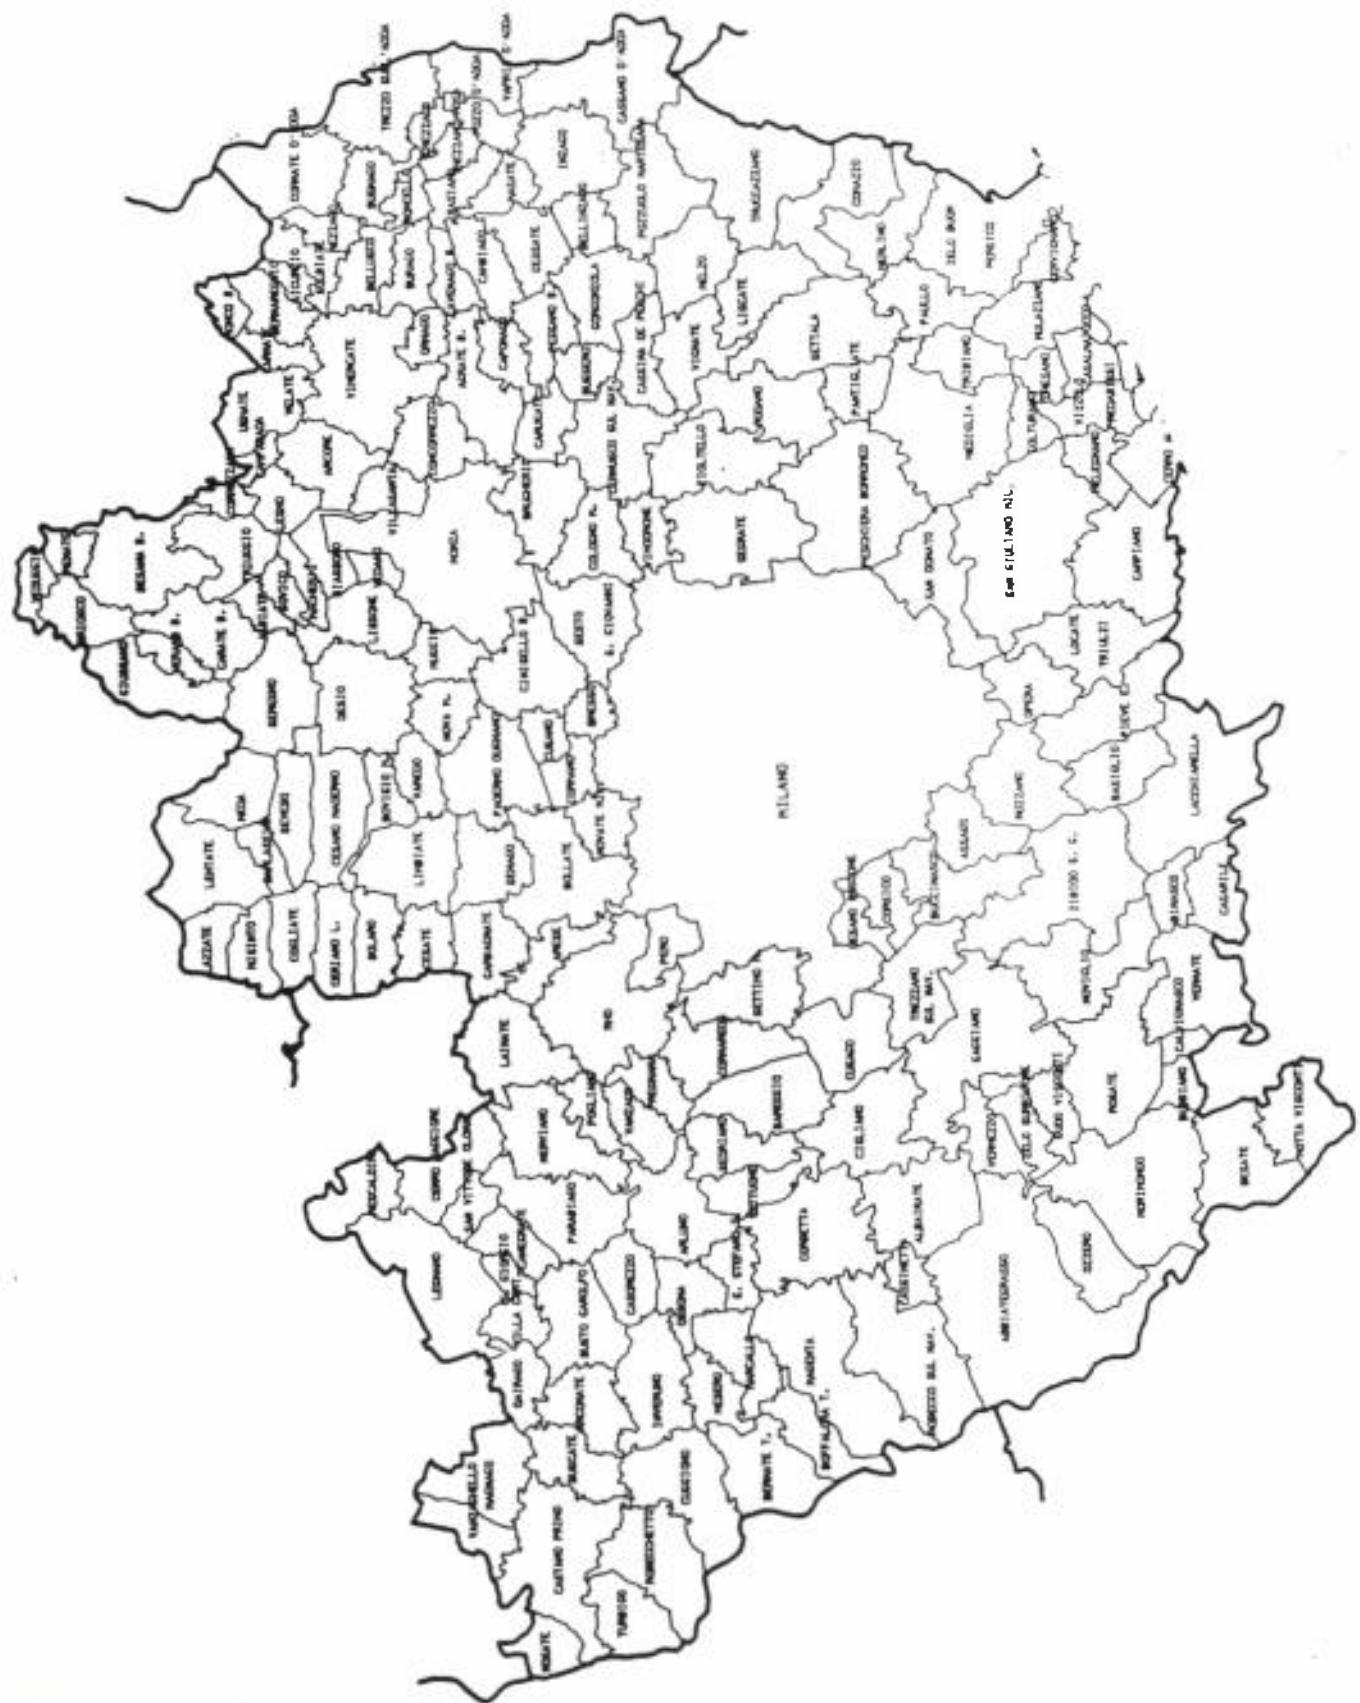

Viene riportata nel presente volume una serie di elaborazioni dei dati disponibili tendenti ad evidenziare, da un lato le caratteristiche specifiche delle oscillazioni piezometriche e dall'altro l'assemblaggio di tutti i dati analitici disponibili. Tali elaborazioni riguardano essenzialmente caratteristiche temporali delle oscillazioni piezometriche quali analisi dei massimi e dei minimi livelli nonché grafici di escursione annuale. Ci si augura che negli anni a venire con il definitivo avvio delle procedure e del funzionamento del Sistema Informativo Falda della Provincia di Milano, si potranno integrare le attuali elaborazioni con nuovi approfondimenti tendenti ad incrementare le conoscenze degli acquiferi Milanesi.
